#### Product description

The “Digital POWER SoundModul” (DPSM) audio system is completely new and has been developed exclusively for use in MINI models. It is an extremely high quality and powerful audio system that will meet every conceivable demand for POWER!

#### Sales features/Benefits

- The various components, such as the speakers that have been specially developed for this system, require no additional metalwork on the car and are simply inserted into the existing installation sites to replace the original speakers! In addition there are no restrictions on installing any other options
- The system can be fitted in both LHD and RHD models
- The completely new (fully digital) audio amplifier forms the heart of this outstanding new audio system

#### Delivery

- No parts are needed other than those supplied in the retrofit kit
- User manual

#### Technical information

Music output: 660 W  
Frequency sweep: 20...25,000 Hz  
Noise level: 128 dB

#### Note

Not suitable for cars that are fitted with the “Harman/kardon” system.

To obtain excellent sound the **DPSM** may only be fitted in conjunction with the “Boost” car radio. An additional subwoofer is not required and is, in fact, not available. ◀

#### Availability

From 10/2003 for all MINI cars

#### Installation time

Approx. 5.0 hours

#### EPC-CD

From 10/2003

#### Installation instructions

BMW Aftersales portal or EBA CD from 10/2003  
01 29 0 303 939

#### User manual

Included in parts kit  
01 29 0 302 149

#### Part number

82 83 0 301 907

#### Safety note

The noise level generated by the **DPSM** may cause health problems to the people in the car if the volume is turned right up! ◀
